THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. **PROSECUTION ON THE MERITS IS CLOSED.** THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN **THREE MONTHS** FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. **THIS STATUTORY PERIOD CANNOT BE EXTENDED.** SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

A. Pay TOTAL FEE(S) DUE shown above, or

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

IMPORTANT REMINDER: Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.

1. Claims 1-3 and 6-31 are allowed.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: none of the prior art either alone or in combination disclose or teach of the claimed combination of limitations to warrant a rejection under 35 USC 102 or 103. Specifically, in reference to independent claim 1 (and its dependents), none of the prior art either alone or in combination disclose or teach of the claimed method of acousto-optical imaging specifically including as the distinguishing features in combination with the other limitations the claimed "extracting a digital information item from the interferogram $I(r, t)$, obtaining the coordinates of the focal point of the object to be imaged, to which the digital information item relates, and repeating steps (a) to (g) for various focal points of the acoustic wave in the object to be imaged, these various focal points being aligned along the first object direction".

Regarding independent claim 6 (and its dependents), none of the prior art either alone or in combination disclose or teach of the claimed method of acousto-optical imaging specifically including as the distinguishing features in combination with the other limitations the claimed "at least one digital information item is obtained by decoding said digital information items obtained in the course of steps (f) of each iteration as a function of the frequencies used, and in which, in the course of step (g), the coordinates of at least one point of measurement of the object to be imaged to which the digital information item obtained in the course of step (f') relates are obtained,

by decoding the said digital information items obtained in the course of steps (f) of each iteration as a function of the frequencies used".

Regarding independent claim 9 (and its dependents), none of the prior art either alone or in combination disclose or teach of the claimed method of acousto-optical imaging specifically including as the distinguishing features in combination with the other limitations the claimed "extracting a digital information item from the interferogram $I(r, t)$, and estimating the complex amplitude $E_s(r)$ of the acoustic component on the basis of the interferogram $I(r, t)$, and obtaining the coordinates of a point of measurement of the object to be imaged, to which the digital information item relates".

Regarding independent claim 20, none of the prior art either alone or in combination disclose or teach of the claimed method of acousto-optical imaging specifically including as the distinguishing features in combination with the other limitations the claimed "a semi reflecting mirror, transmits a part of the lateral band wave and a part of the carrier wave forming the incident wave, and reflects a part of the carrier wave and a part of the lateral band wave forming the reference wave".

Regarding independent claim 21, none of the prior art either alone or in combination disclose or teach of the claimed method of acousto-optical imaging specifically including as the distinguishing features in combination with the other limitations the claimed "a second acousto-optical modulator intercepts the first frequency shifted wave and generates a second frequency shifted wave, the frequency of which is shifted by a value Δf_2 , possibly negative, with respect to the shifted wave, the second frequency shifted wave forming the reference wave, the frequency of

which is thus shifted in frequency with respect to the incident wave by a value $\Delta f_1 + \Delta f_2$, thus determining a known phase difference $\phi_i(t)$ between these two waves".

Regarding independent claim 22, none of the prior art either alone or in combination disclose or teach of the claimed method of acousto-optical imaging specifically including as the distinguishing features in combination with the other limitations the claimed "two independent laser sources, locked in phase by electronic slaving, generate the incident and reference waves, exhibiting a known phase difference $\phi_i(t)$ between them".

Regarding independent claim 23 (and its dependent), none of the prior art either alone or in combination disclose or teach of the claimed method of acousto-optical imaging specifically including as the distinguishing features in combination with the other limitations the claimed "a second acousto-optical modulator intercepts the first frequency shifted wave and generates a second frequency shifted wave, the frequency of which is shifted by a value Δf_2 , possibly negative, with respect to the shifted wave, the second frequency shifted wave forming the reference wave, the frequency of which is thus shifted in frequency with respect to the incident wave by a value $\Delta f = \Delta f_1 + \Delta f_2$, thus determining a known phase difference $\phi_i(t)$ between these two waves".

Regarding independent claim 25, none of the prior art either alone or in combination disclose or teach of the claimed method of acousto-optical imaging specifically including as the distinguishing features in combination with the other

limitations the claimed "vibration generating device is used to obtain an acoustic cue of the zone of the object to be imaged, and in which the digital information item extracted in step (f) is used jointly with said acoustic cue".

Regarding independent claim 26 (and its dependent), none of the prior art either alone or in combination disclose or teach of the claimed installation for acousto-optical imaging of an object specifically including as the distinguishing features in combination with the other limitations the claimed "means for extracting a digital information item, estimating the complex amplitude $E_s(r)$ of the acoustic component on the basis of the interferogram $I(r, t)$, and obtaining the coordinates of a point of measurement of the object to be imaged, to which the digital information item relates, from the interferogram".

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
